Modernize Your Business

THE high cost of doing business, together with scarcity of labor and material, is forcing industry to seek every means to economize.

The Progressive Manufacturer who uses GAS for fuel has a decided advantage over his competitors.

GAS IS THE MODERN INDUSTRIAL FUEL

It requires no storage space, no labor cost of handling, and it obviates soot, dirt and the bother and expense of ash removal.

GAS FUEL IS ALWAYS AVAILABLE

The service is constant and dependable, day and night, defying storms, blockades and other "tie-ups." :: :: :: ::

Gas is delivered directly to the appliance, and the heat can be regulated exactly to the temperature desired, and in addition, the expense begins and ends at the turn of a lever.

Let our Industrial Department show you Gas Appliances designed particularly for the work you are doing. It will pay you to investigate.

INDEX

IMPORTANT NOTICE—The following index to the 1918 Brooklyn Eagle Almanac has been entirely revised and rearranged according to the most up-to-date library and encyclopedic indexing methods. A straight alphabetical arrangement has been followed in order to facilitate quick and easy reference to any subject.

CAUTION—In using this index, disregard such geographical titles as, for example, "Kings County Sheriff" and look only for "Sheriffs," where will be found the page numbers for each of the local county sheriffs' offices. Similarly, the "Metropolitan Museum of Art" will be found under "Museums"; the "New York State Barge Canal" will be found under "Canal," and also cross-indexed under "Barge." Likewise, the "United States Department of Agriculture" at Washington will be found under "Agriculture," etc., etc.

SPECIAL NOTICE Regarding Societies and Associations—Owing to the thousands of organizations about which detailed information is contained in the Eagle Almanac, it is obviously impossible to index each under its individual title. For quick reference all these organizations have been grouped or classified under chapter headings according to the general purpose or function of the society. Consult the following list of these chapters for the KIND of organization you are looking for. For example: The "American Seamen's Friend Society" is classified under "Hospitals, Homes and Societies for Relief," and is found with the Manhattan list of those devoted to "Special Relief." Similarly, the "Froebel Society of Brooklyn" is classified in the "Literary Societies" chapter under the Brooklyn list.

THE BROOKLYN EAGLE ALMANAC.

VOLUME XXXIII.

JANUARY, 1918.

THE 1918 EAGLE ALMANAC AND ITS FEATURES.

A BOOK of the character of THE EAGLE ALMANAC is highly valuable to a library in historic times, as the present. History in the making will be found recorded herein with that degree of accuracy that has characterized THE EAGLE ALMANAC since its first issue, thirty-three years ago.

Newspaper enterprise of an unusual character has marked THE EAGLE during the progress of the World War. Of great service to the public was THE EAGLE's exclusive publication of "draft extras" on July 20 and July 21, 1917, giving not only the numbers of those drafted in Brooklyn and Long Island, but their names and addresses as well, a newspaper task which was the greatest of its kind since the Civil War. This journalistic "feat" was favorably commented upon by government officials, press and public. On October 25 THE EAGLE issued with its regular edition a highly interesting magazine supplement devoted to the part the United States—with particular reference to Brooklyn and Long Island—played in the great war. It was a concise and accurate history of events well worthy of preservation.

THE EAGLE gave the use of its auditorium to Local Draft Boards, where meetings were held and lectures of instruction given to the members.

Among the popular EAGLE publications of 1917 was a handbook giving information pertaining to the draft and showing draft exemption district charts; a Home Defense Manual that gave U. S. Military Drill Regulations and other data that the civilian soldier should know; a Long Island Automobile Guide; the Code of Ordinances of the City of New York; Penal Code; Trolley Guide; New York City Charter, and similar books of practical value and of timely importance.

THE EAGLE Current Event Talks were maintained as in past years. They were well attended, crowds filling the Eagle Auditorium each week.

Under the auspices of THE EAGLE management a series of lessons in the French language were given to large classes by a competent instructor in the Eagle Building to enlisted men and men and women directly or indirectly interested in some branch of U. S. Army and Navy service.

The Eagle Information Bureau broadened its field of service, mainly because of the entry of the United States into the war, and rendered valuable and timely service. The Eagle summer and winter resort directories, apartment house and educational directories were issued as usual.

LIGHT AND POWER IN THE EAGLE BUILDING.

ALL light and power used in the Eagle Building is obtained from the Edison Electric Illuminating Company of Brooklyn. THE EAGLE formerly maintained a private generating plant, but this was discontinued some years ago because it was found more economical, as well as more reliable, to operate by means of Edison service.

A newspaper must exercise the greatest care in the matter of reliability of its power supply. If power should fail at a critical moment, or for that matter at any moment, it would mean delays which in the conduct of a daily newspaper, where every feature of the work is timed to a nicety, might prove disastrous.

The time of going to press for each edition of the paper is closely calculated in order to make connections with an extensive delivery system and it is easy to imagine the chaos an interruption in power supply might cause. Careful investigation convinced THE EAGLE that the most reliable source of power was Edison service, and this newspaper accordingly contracted with the Edison Company for all energy used in driving elevators, typesetting, printing, stereotyping, bookbinding and all other machinery. The installation consists of about 850 horse-power in motors, lights, etc.

The good judgment of this move has been justified by the result, Edison service has now been in use for twelve years, never yet having failed THE EAGLE.

BOROUGH OF BROOKLYN STREET AND AVENUE DIRECTORY

The letters and numbers following names indicate position of the thoroughfare on the Almanac map. Note that in case of long thoroughfares, important cross streets with corner numbers are given. A placed in the right or left column of figures denotes that the thoroughfare does not extend to that side. For railroad connections, etc., consult the map.

BOROUGH OF BRONX STREET AND AVENUE DIRECTORY

The following resolution, adopted by the Board of Aldermen March 21, 1882, and approved by the Mayor March 28, 1882, will explain the plan of numbering the streets north of Harlem River: That Willis Avenue be numbered, commencing at the Harlem River, and that said numbering run continuously through Willis, Melrose and Webster avenues. That all other avenues in the Twenty-third and Twenty-fourth Wards, having a generally northerly and southerly direction, be given the same number at the cross street nearest their southern terminus as that on Willis, Melrose, and Webster avenues at the intersection of said cross street, and then numbered accordingly.

The prefix West is given to all cross streets in the Twenty-third and Twenty-fourth Wards lying west of Jerome av., which runs from Harlem River at Macomb's Dam Bridge to City line, and that the prefix East is given to all cross streets lying east of said avenue and the Harlem River.

The letters and numbers following names indicate position of the thoroughfare on the Almanac map.

DIRECTIONS.—When a plumb line matches with "A" or "B" the Pole Star is approaching the meridian and the true local mean time then is the time in column "on line." Interpolate for intermediate days, subtracting 4 min. for each day after or adding 4 min. for each day before any given date.

EXAMPLE:—July 25, begin to watch plumb line about 4.40 A.M., and Polaris will be exactly in line at 5.10 A.M. correct mean local time. To change this into local Standard Time add 4 min. for each degree west of the time meridian and subtract same for stations east of the meridian. Thus, at Yakutat, Alaska, being 5° west of the 135th Standard Meridian 20 min. must be added to the observed time for Standard Time and at Jacksonville, Fla., 8° 15' east of 90th meridian, 33 min. must be subtracted for Central Standard Time. A light placed back of the head will aid in seeing the plumb lines which may be hung in a convenient window and let the bob hang in a dish of water to prevent the wind from disturbing the line or the observation may be made with closed window.

If a Noon Mark is desired use two plumb lines and connect them by a row of tacks driven in the porch floor in the range of a pillar, post or window casing that will cast a shadow and apply the "Equation of Time" or "Sun Fast or Slow," or set time piece as directed in "Sun at Noon Mark," or by meridian passage of Moon, planets or stars, using an additional perpendicular on the Noon Mark to get the range by.

The above is only applicable between latitudes 30° + and 60° + because of the low altitude of pole in the first and high in the last.

ECLIPSES—There will be three eclipses this year, as follows.

I.—Total of the Sun on the afternoon of June 8, visible as a partial eclipse throughout North America; in the U. S. the total phase will be visible from the State of Washington to Florida, in a belt about 120 miles wide at the W. end and 50 at the E. From an elevation the Moon's shadow may be seen advancing eastward over this track at terrific speed, making the 3,000 miles in 47 min. The speed will be least on the Pacific Coast and greatest on the Atlantic. Along the Atlantic seaboard the Sun will set more or less eclipsed. South of belt of totality the northern limb of the Sun will be eclipsed and north of it the southern, and the size will decrease with the distance, about one digit or 1-12 of the diameter of the Sun, every 240 miles. The following is standard time of the total eclipse and the names of the more important places within or very near the zone of the total eclipse:

Mt. Olympus, Anderson and Gray's Harbor in N. W. Washington, 2:55, passes over Tacoma, Olympia, Mts. Ranier, St. Helena, Adams, etc., and reaches the Yakima Indian Reservation at 3:00; crosses the Columbia River into Oregon at The Dalles, leaving Walla Walla close on the north and reaches Baker City at 3:05; crosses the Snake River into Idaho at Huntington and Boise at 4:06-8, and reaches the S. E. corner of the State at 4:15; crosses the two N. E. corners of Utah and the S. W. corner of Wyoming and reaches the N. W. corner of Colorado at 4:20, leaving Salt Lake City and Ogden just to the S.; thence over the mountains of N. W. Colorado at Leadville, Denver, Boulder, Longmont, Cripple Creek and Colorado Springs at 4:24; Cheyenne, Laramie, Wyoming, are close on the north and Trinidad, Pueblo, Col., on the S.; enters Kansas, near Tribune, passes over Dodge City and reaches Medicine Lodge at 5:30; enters Oklahoma, near Alva and Ingersoll, reaching Guthrie at 5:32 and the Arkansas line at Waldron, S. of Ft. Smith, at 5:35, Oklahoma City being close to or on the S. boundary and Arkansas City and Tulsa on the N.; passes across Arkansas to Greenville on the Miss. R. at 5:37, with Hot Springs close to the N.; Little Rock and Pine Bluff but a trifle off and Texarkana a little further S.; crosses Miss. to Meridian at 5:38, with Columbus and Winona just N. and Jackson and Vicksburg just S. of the line; enters Alabama at Healing Springs at 5:39, leaving Mobile just to the S. and reaches the N. W. corner of Fla. at 5:40; sweeps across W. Fla. in 1 min. and to Cedar Keys in one more, entering the Atlantic just S. of Cape Canaveral at 5:42. De Funiac Springs, Leesburg and Orlando being near the middle of the path and Gainesville and DeLand just N. of it, while Brooksville and Dade City are close to the S. line.

The different phases will be visible as follows:

OTHER WORLDS AS SEEN FROM OURS IN 1918.

THE SUN—Almost the entire Western Continent will be favored in solar eclipses in 1918. A total eclipse of the Sun is most impressive. When the pointed shadow of the Moon is long enough to reach the Earth, as she swings between us and the Sun, it traces a line in a general east and west direction across continents and oceans, limited in length only by the interval between the rising and setting of the Sun, and that greatly shortened by the speed of the Earth in its diurnal revolution, so that the actual interval is, in this case, reduced to about 4th. The higher the Sun, the slower will be the speed of the shadow spot and vice versa. Hence, in this eclipse of June 8, when the shadow first touches this continent, at the N. W. corner of the U. S., its motion will be slowest, and when it leaves us, on the Coast of Florida, it will be greatest, being near sundown. Then, too, the width of the belt of totality, and also the duration of the total phase will vary with the distance of the Moon, decreasing with increased distance, and in the same eclipse varies with the position of the observer, being smallest where the shadow is most oblique, i.e., near the sunrise and sunset regions. It will also be apparent that the more oblique the shadow, the greater will be its longitudinal diameter, which would give greater duration but for its consequent vast increase in speed. When the point of the dark shadow does not reach the Earth, the light shadow or penumbra yields partial eclipse, similar to that on either side of the total belt, to a distance of 2,000 to 3,000 miles. The duration of totality will vary from an instant to 8 min. During the early life history of the Moon, it was much nearer to us than at present, so that total eclipses were of several hours duration and Arctic temperatures followed; even a brief eclipse will cause a perceptible chill and dew to form.

MERCURY—(See "Planets Brightest," etc.)

VENUS will be the brightest of the starry hosts at the beginning of the year, illuminating the eastern sky like a great electric light hanging up in Capricornus.

At the first of the year Venus will be in Capricornus and moves E. until Jan. 17, when, after a brief rest, she backs westward past the stars until lost in the light of the Sun the last of Jan. The latter part of Feb. she appears on the other—west side—of the Sun as a morning star; stationary, Mch. 1, and reaches her full glory as a morning star, Mch. 16, having passed within 2 degrees of the Moon and again showing the same phase. Apr. 2 she will be 3 deg. N. of Uranus, affording a most excellent opportunity of seeing and identifying this remote planet, using an opera glass or small telescope. She reaches her greatest angular distance from the Sun—46 deg.—Apr. 21, and crosses the prime meridian of the heavens, May 5, passing 6 deg. S. of the Moon on May 7 and again on June 5, as she enters Aries. From June 21 to 26 she will be gliding along just S. of the Pleiades, and on July 5 will be 4 deg. N. of Aldebaran, will the Moon 3 deg. S.; July 27, $\frac{1}{2}$ deg. S. of Jupiter in Gemini, in a rich star field—Castor, Pollux and Procyon to the left, Sirius S., Betelgeuse to the right and below, while Capella is higher. Aug. 4 the Moon passes 1 deg. S. of her, and will again in conjunction with the Moon, Sept. 3. On the morning of Sept. 5 she will almost eclipse Saturn; their nearest approach will occur while they are about 1 h. below the horizon, but they will be strikingly close when rising. Sept. 10 she will be only 1 deg. N. of the brilliant Regulus in the end of the handle of the sickle, rising about 1 h. before the Sun and from this on her path lies too near the Sun for good seeing.

MARS will be an attractive object in the evening skies throughout most of the year, being in eastern Leo at first, about midway between Regulus and Denebola, he will increase in brilliancy and rise earlier in the evening until Mch. 15, and will be practically an all-night star throughout Mch. He advances past the stars until Feb. 4, when he becomes stationary, and then retrogrades until stationary again, Apr. 27, and then advances the remainder of the year, passing his point of nearest approach to the Earth, Mch. 18, when brightest and very close to his position at the beginning of the year; Aug. 4, only 4 deg. N. of Spica, and Aug. 25, 3 deg. S. of Arcturus; Oct. 12-13, 3 deg. N. of Antares; traverses the Milky Way, Nov. 1-20, and keeps close company with the Milkmaid's Dipper, in Sagittarius to the end of the month, being very dim at the close of the year. To an inhabitant of Mars the Earth would present all the phases that the Moon and Venus do to us. Some canals on Mars are over 2,000 miles in length and straight as an arrow.

JUPITER will be most favorably situated during the first part and last of the year; dim in May and invisible in June. When at his best he will be in the most interesting starfield in the heavens—between the Pleiades on the W. and the brilliants, Castor and Pollux, on the E.; in conjunction with the Moon, Jan. 22, Feb. 18, Mar. 17 and Apr. 14, being from 1 to 4 deg. S. When again first visible in the evening twilight he will be midway between Aldebaran and El Nath and in line with Sirius and Betelgeuse. In Aug. he will again be seen, but as a morning star, and much nearer Castor and Pollux just to the E.; Procyon and Sirius to the S. and the glories of Orion to the S. W. On Oct. 25, Nov. 25 and Dec. 19 the Moon will pass about 5 deg. S. of him, being almost at his brightest and an all-night star at the close of the year.

SATURN will be most favorably situated in Jan. and Feb., when brightest and an all-night star, when in the midst of very interesting star groups and constellations; the majestic Sickle close to the left, the Bee Hive or Praesepe to the right and that galaxy of celestial brilliants, Castor, Pollux, Procyon and Sirius, still further to the right and below. His marvelously beautiful ring system, while steadily working into less favorable position for visibility, may still be seen fairly well, their inclination being from 11 to 15 deg., against a maximum of 25 deg., their southern surface being presented to our view.

URANUS and **NEPTUNE**—See under Venus for a favorable time to catch Uranus, early in April, but no such good mark for Neptune. Look for him about 1 deg. S. of the rich star-cluster Praesepe in Jan. and Feb.

THE PLANETS—Evening, Morning and All-Night Stars or Planets, Brightest or Best Seen, Dim or Invisible.

MORNING STARS—W. of the Sun. Mercury, Jan. 13-23 and Sept. 18 to 28, rising at early dawn near where the Sun will later rise. Venus, from Feb. 10 to Nov. 23. Mars, not this year. Jupiter, from June 15 to Oct. 8. Saturn, from Aug. 11 to Nov. 21.

ASTRONOMICAL CALCULATIONS—Continued.

EVENING STARS—E. of the Sun. Mercury, Mch 21 to 31, setting at close of twilight. Venus, until Feb. 10 and after Nov. 23. Mars, all the year. Jupiter, until June 15 and after Oct. 8. Saturn, until Aug. 11 and after Nov. 21.

BRIGHTEST OR BEST SEEN—Mercury, within the time limits mentioned as an evening and morning star. Venus, Jan. 1 to 10, as an evening star, and Mch. 11 to 21, as a morning star. Mars, all the year. Jupiter, not at his very brightest during the year, but best seen in Dec., being opposite the Sun and brightest in Jan., 1919. Saturn, Jan. 15 to Feb. 15, being at opposition, Jan. 31. Uranus, in Aug., Neptune, in Jan.

ALL-NIGHT STARS OR PLANETS—Only superior planets, those outside the orbit of the Earth can gain positions opposite the Sun, rising at sunset and shining all night; these in 1918 are: Mars, in Mch., being at opposition, Mch. 15. Jupiter, until Aug., but very close to it in Dec. Saturn, Jan. 15 to Feb. 15, at opposition, Jan. 31. Uranus, during Aug., opposition, Aug. 18. Neptune, Jan-Feb.

INVISIBLE OR VERY DIM—Mercury, at all other times than within the time limits stated above, when an evening or morning star and brightest. Venus, Feb. 5 to 15, being at inferior conjunction, Feb. 10, also Nov. 20-25, when at superior conjunction. Mars, not at all, unless at the very last of the year. Jupiter, in June, being in conjunction with the Sun, June 15. Saturn, in Aug., being at conjunction, Aug. 11, and Neptune and Uranus always.

WEATHER AND TEMPERATURE SIGNALS.

NOTE.—The display of weather and temperature flags, with the exception of the cold-wave flag, is now confined to rural districts and towns of 5,000 or less inhabitants; the display has been discontinued in places of greater population, except that arrangements are sometimes made by which the forecasts are furnished to certain persons or firms who make the display without expense to the government. The cold-wave flag will be displayed as heretofore.

When No. 4 is placed above Nos. 1, 2, or 3, it indicates warmer; when below, colder; when not displayed, temperature is expected to remain about stationary. The cold-wave flag is displayed when an unusual fall in temperature (the limits varying with the locality and time of year) is anticipated. When displayed on poles, the flags are arranged to read downward; when displayed from horizontal supports, a small streamer is attached to indicate the point from which the signals are to be read.

Storm and Hurricane Warnings.

1st.—A storm warning; red flag with black center. 2d.—When red pennant is hoisted above storm warning, winds are expected from northeast quadrant; when below, from the southeast quadrant. 3d.—When white pennant is hoisted above storm warning, winds are expected from the northwest quadrant; when below, from the southwest quadrant. 4th.—Red pennant alone, small craft warning, indicates squalls and winds dangerous to small craft. 5th.—Hurricane warning and extremely dangerous storms, two red flags with black centers, displayed one above the other. 6th.—Night storm warnings; N. E., two red lanterns; S. E., one red lantern; S. W., white lantern below red lantern; N. W., white lantern above red lantern; Hurricane two red lanterns with white lantern between.

Storm Warning Stations.

Storm warning display stations, located in New York City and vicinity, are with exception of Sandy Hook, N. J., under the control of the Weather Bureau office, 17 Battery Place, Manhattan.

Stations equipped with lanterns displaying day and night warnings throughout the year:

New York City, 17 Battery Place, Sandy Hook, N. J.; Long Branch, N. J.; Fort Schuyler (Throg's Neck), N. Y.; Oyster Bay, N. Y.

Storm warnings are furnished to naval wireless sta-

tions at Brooklyn Navy Yard and Fire Island, N. Y., for distribution to vessels at sea equipped with wireless apparatus.

Stations displaying day warnings during the summer months:

New Rochelle Yacht Club, New Rochelle, N. Y.

Day warnings are displayed throughout the year at Keyport Yacht Club, Keyport, N. J.; Raritan Yacht Club, Perth Amboy, N. J.; Jack's Boat House, 138th and No. River, and on U. S. Revenue Cutters in the vicinity.

*For more accurate differences see "Tide Tables" published annually by the U. S. Coast and Geodetic Survey.

The chief cause of the tides is the attraction of the moon, which affecting most strongly the side of the earth nearest to it, draws or heaps up the waters in the parts of the earth successively turned toward it. When sun and moon are in conjunction or opposition, at times of new and full moon, their tidal waves will be superposed, and the effect will be a "spring tide"; when in quadrature, the lunar tide will result in a "neap tide."

HIGH WATER AT NEW YORK (GOVERNOR'S ISLAND).

Following high water tables were prepared and furnished by the United States Coast and Geodetic Survey at New York City. Oh. 00m. is midnight, and 12h. 00m. is noon. To change Eastern Standard Time to New York "Local Time," add 4 minutes. Eastern Standard Time is 5 hours slower than Greenwich Time. The heights, in ft. and tenths, are reckoned from mean low water. All hours less than 12 are in the forenoon (a. m.), all greater are in the afternoon (p. m.), and when diminished by 12 give the times after noon; for instance, 15:47 is 3:47 p. m. ☾, new moon; ☽, 1st quar.; ☾, full moon; ☾, 3d quar.; E, moon on equator; N, S, moon farthest north or south of equator; A, P, moon in apogee or perigee.

POPULATION OF NEW YORK CITY AND SUBURBS.

In the U. S. Census for 1910, population has been computed for cities and their adjacent territory, including besides the central city, all cities, towns and villages or other divisions located within ten miles of the boundaries of the central city. The metropolitan district is defined as the Greater City of N. Y., together with the urban portion only of the territory within ten miles of the city limits. The figures for New York City are as follows:

New York.	Area, acres	1910 Pop'l.	1900 Pop'l.	P.C. Inc.
Metropolitan district	616,927.6	6,474,568	4,607,804	40.5
In city proper	183,555.0	4,766,883	3,437,202	38.7
Outside urban portions	433,372.6	1,707,685	1,170,602	45.9
City and all adjacent territory	875,515.2	6,630,599	4,718,255	40.5
All adjacent territory	691,960.2	1,863,716	1,281,053	45.5

With the adjacent territory of New York are the following municipalities of 5,000 or over, 1910 figures. New York: Yonkers city, 79,803; Mount Vernon City, 30,919; New Rochelle city, 28,867; Mamaroneck village, 5,699. New Jersey: Newark city, 347,469; Jersey City, 267,779; Paterson city, 125,600; Elizabeth city, 73,409; Hoboken city, 70,324; Bayonne city, 55,545; Passaic city, 54,773; West Hoboken town, 35,403; East Orange city, 34,371; Perth Amboy city, 32,121; Orange city, 29,630; Montclair town, 21,550; Union town, 21,023; Kearney town, 18,659; Bloomfield town, 15,070; Harrison town, 14,493; Hackensack town, 14,050; West New York town, 13,569; Irvington town, 11,877; Englewood city, 9,924; Rahway city, 9,337; Rutherford borough, 7,045; South Orange village, 6,014; Nutley town, 6,009; Roosevelt borough, 5,786; Guttenberg town, 5,647.

The following table shows industrial importance of the 9 chief metropolitan districts of the U. S.

AREA, POPULATION AND DENSITY OF BOROUGHES.

The determination of an exact area of New York City and its boroughs is a debatable matter. This is due to the irregular waterfront lines and the existence of considerable areas under water, marsh lands, or meadow lands, which different surveyors compute differently. Some base their figures within pierhead lines, others within bulkhead lines and still others within borough lines. No official figures exist for the exact areas of the boroughs. The Eagle Almanac gives below the areas of the Assembly Districts, as apportioned by the 1917 Legislature (see pages 100-106 for boundaries), computed by the topographical bureaus of each borough; also the areas computed by wards by the Health Department. The discrepancies are explained above. The Eagle Almanac gives the preference to the Topographical Bureau figures, as same are computed for the official use of each Borough President's office.

ACREAGE OF ASSEMBLY DISTRICTS.

(Furnished The Eagle Almanac through courtesy of chief engineers of the several Topographical Bureaus. No census of Assembly Distrs., as apportioned in 1917, was taken, therefore the density cannot be computed here. See Boundaries of A. D., pages 100-106, for citizen population. For census acreage and density of dists. within former boundaries see page 84, 1917 Eagle Almanac.)

THE CAPITOL IN WASHINGTON.

The corner stone of the original capitol building was laid by President Washington, Sept. 18, 1793. The north wing was finished in 1810 and the south wing in 1811, a wooden passageway connecting them. The original designs of the structure were made by Dr. Wm. Thornton. The 2 wings were burned by the British in 1814, but were immediately restored. In 1827 the original building was com-

pleted at a cost of \$2,433,844.13. Extensions of the wings were begun in 1851 and completed in 1859. The dome, which is 287 ft. 5 in. in height, was completed in 1855. The capitol stands in latitude 38 deg. 53 min. 20.4 sec. north and longitude 77 deg. 00 min. 35.7 sec. w. from Greenwich. The area covered by the building is 153,112 sq. ft. Value, building, \$15,000,000; grounds, \$10,400,000; total, \$25,400,000.

BOARDS OF CHILD WELFARE.

Under the Hill-McCue bill, for the relief of the children of widowed mothers, approved by Gov. Whitman, April 7, 1915, boards of child welfare, which administer the act, are appointed throughout N. Y. State. Each county has a board of 7 members, excepting N. Y., where the membership comprises 9, with the Commr. of Public Charities as an ex-officio member. The Mayor of N. Y. designates the 8 other members, while in the other counties the county judge makes the appointments, the county supt. of the poor in each co, being an ex-officio member of board. The members serve without compensation, and their administration of the law is supervised by State Bd. of Charities.

A board of child welfare may, in its discretion, when funds have been appropriated therefor, grant an allowance to any dependent widow residing in the county or city wherein she applies for an allowance, and who is deemed by the local board of child welfare to be a proper person mentally, morally and physically to care for and bring up such child or children, under 16 yrs., provided such widow has been a resident of the county or of the city wherein application for allowance is made for period of 2 years immediately preceding application, and whose deceased husband was a citizen of the U. CIVIL SERVICE INFORMATION.

FEDERAL.

Officers—Three commissioners are appointed by the President to assist him in preparing suitable rules for carrying the civil service act into effect and in enforcing the law and the rules.

General Rules—The fundamental principles governing appointments to Federal civil positions are found in the civil service act itself. The present rules were approved March 20, 1903, and went into effect April 15, 1903. They have since been revised in part from time to time. The classified service includes all officers and employees in the executive civil service of the United States except mere unskilled laborers, persons whose appointments are subject to confirmation by the Senate and certain persons whose positions are exempted from the operation of the civil service act under the terms of the laws creating the positions.

Examinations—These are conducted by boards of examiners chosen from among persons in Government employ and are held as frequently as the needs of the service require in all the States and Territories, at convenient places.

Qualifications of Applicants—The Commission is authorized to exclude from any examination a person who is not a citizen of or who does not owe allegiance to the United States; who does not come within the age limitations prescribed; who is physically disqualified for the service which he seeks; who is addicted to the habitual use of alcoholic beverages to excess or to the use of opium, morphine or other narcotic drugs; who has been dismissed from the public service for delinquency or misconduct; who has made a false statement in his application or has been guilty of fraud or deceit in any manner connected with his application or examination, or has been guilty of crime or infamous or notoriously disgraceful conduct; who has been dishonorably discharged from the United States Army, Navy or Marine Corps, or who is otherwise unfit, in the opinion of the Commission, for the position sought.

Method of Appointment—Whenever a vacancy exists the appointing officer makes requisition upon the Civil Service Commission or one of its twelve district secretaries for a certification of names to fill the vacancy, specifying the kind of position vacant, the sex desired and the salary. The Commission thereupon takes from the proper register of eligibles the names of the three persons standing highest of the sex called for and certifies them to the appointing officer, who is required to make selection. He may choose any one of the three persons whose names are certified, returning the other two to the register to await further certification. The time of the examination is not considered, the highest in average percentage on the proper register must be certified first. The period of eligibility is usually one year from the date the name is entered upon the register.

Removals—No person can be removed from a competitive position except for such cause as will promote the efficiency of the public service.

Inquiries—Inquiries concerning matters connected with the Federal Civil Service should be addressed to the United States Civil Service Commission, Washington, D. C., or the civil service district secretary at Boston, New York, Philadelphia, Atlanta, Cincinnati, Chicago, St. Paul, St. Louis, New Orleans, Seattle or San Francisco.

PARKS, DRIVES AND STATUES IN NEW YORK CITY.

Total Park Area of New York City.

Including all lands laid out as parks. Manhattan, 1,487 acres; Bronx, 3,929.19; Brooklyn, 1,151*;
Queens, 1,186.47; Richmond, 63. Total, 7,516.66.

Manhattan, 40,100 feet; Bronx, 48,892; Brooklyn, 153,120; Queens, 1,320; Richmond. —. Total, 243,432.

BROOKLYN.

Park System of Bkln. comprises 54 parks, playgrounds and open spaces, with an area of 1,151* acres, and 15 parkways and streets, with total length of 29 miles. The total assessed valuation of Bkln.'s park property amounts to approximately 75 millions of dollars. Park Dept. Offices, Litchfield Mansion, Prospect Park, Bkln. (For Officers and Employees see City Government Chapter.)

Commsnrs. to lay out a Park System in Bkln. were appointed in 1835. Prospect Park, which contains 528 acres, and is conceded to be one of finest parks in the country, both from a landscape and from a recreation point of view, was acquired in 1859. Development begun July 1, 1866, and completed in Oct., 1867. Land cost \$3,919,370, construction about \$6,000,000.

Attractive features are its natural beauty, great variety of its woodland, Botanic Garden, Menagerie, Greenhouses, Vale of Cashmere, Rose Garden, the formal and old-fashioned Flower Gardens, the large and small lake, with a great quantity of boats for use of public; 300 tennis courts, croquet field and hockey field. The Parade Grounds of about 40 acres is located just south of Prospect Park and is used exclusively for baseball, cricket, bowling on the green and football.

Five parks and 1 p'kway, with aggregate area of 373 acres, front on N. Y. Harbor and adjacent waters. These shore front properties have been only partly developed. The improvement of the Shore Road has been in progress for a number of years, and the 1st part of the development, incl. construction of a sea wall along entire water front from Bay P'kway to Fort Hamilton, was completed in early part of 1915. This promises, in a few years, to be one of the most interesting and picturesque waterfront parks in the world. The development of Dyker Beach Park will be a fine addition; by filling in the marsh land and making an athletic field of some 70 acres, which will be in full view of the Bay and Narrows, ample space will still be left for ornamental park development.

In 1915 the Betsy Head Playground was opened to the public, and is one of the best equipped playgrounds and recreation fields in the U. S. It occupies 4 sq. blocks in the Brownsville section and contains a children's playground and farm gardens, a large athletic field and outdoor gymnasium, shower bath for use throughout the year and an outdoor swimming pool for summer use. The bldgs. and equipment were paid for by bequest of \$187,764.84, made by the late Betsy Head of Suffolk Co. The land, valued at more than \$250,000, was paid for by the property owners within a radius of 1 mile of the playground.

Jamaica Bay Park Gift.

Frederic B. Pratt and Alfred T. White gave to N. Y. C. in Oct., 1917, 123 acres of land about Gerritsen's Basin, Jamaica Bay, worth \$280,755.48, for use as a park. They also agreed to reimburse the city for the cost of an additional 24.5 acres to be acquired through condemnation proceedings to complete the park around the basin.

The land is midway between the Jamaica Bay ends of Nostrand and Flatbush avts. and extends on both sides of Ave. U. The site is of great historical interest. The old tide mill will be preserved; the oldest part of it was built about 1650, and was a focal point to which led the highways of pre-revolutionary times. Neck road connected it with Gravesend village square. The branch of Flatbush turnpike, later called Kimball's lane, connected it with Flatlands and Flatbush, and Ryder's lane connected it with King's Highway. Near the mill was the landing place for shipping, which in the early days sometimes came to port here instead of at New Amsterdam.

*The Pratt-White gift adds about 12½% to the Park area of Bkln.

FEDERAL FARM LOANS.

The primary purpose of the Federal Farm Loan act is to promote agricultural prosperity by enabling farmers to borrow money on farm mortgage security at a reasonable rate of int. and for relatively long periods of time. To attain this object two farm mortgage systems are provided: (1) A system operating through regional land banks; and (2) a system operating through joint stock land banks.

To attract money to the farm loan field, the act provides a method whereby those who have money to lend can find safe investments in the form of debentures or bonds, of small and large denominations, issued by the banks and based on the security of mortgages on farm lands.

These two systems are under the general supervision of a Federal farm loan board in the Treasury Dept., composed of the Sec. of the Treas., as ch. ex officio, and 4 mem. appointed by President. This board has authority to appoint appraisers, examiners and registrars who will be public officials.

MUNICIPAL FINANCE.

In 149 of the 213 American cities of more than 30,000 population the excess of expenditures for governmental costs, including interest and outlays for permanent improvements, over revenues, during the fiscal year 1916, amounted to \$86,013,326, or \$3.68 per capita. In the remaining 64 cities the excess of revenues over expenditures was \$12,422,256, or \$1.40 per capita. Taking the entire 213 cities as a group, the excess of expenditures over revenues amounted to \$73,591,070, or \$2.28 per capita. The net indebtedness of these cities averaged \$76.64 per capita—nearly 8 times as great as the corresponding one for the National Government; 89 cities, or nearly 42% of total number, are operating under the commission form of government.

THE RHODES SCHOLARSHIPS.

The Rhodes Scholarships at Oxford Univ., England, were established under the will of Cecil Rhodes. Scholarships are allotted as follows: 100 to the U. S. (2 to each state and territory), 15 to Germany and from 3 to 9 each to the several British Colonies. By an act of Parliament the provision relating to German scholars has been cancelled and these scholarships are to be distributed among communities within the British Empire not provided for under the will. In the U. S. candidates must have completed in a satisfactory manner at least 2 years' work in a college of liberal arts and sciences. The limits of age are 19 and 25. (See page 343, 1916 Eagle Almanac for further particulars.)

Scholars are chosen from the U. S. annually from two-thirds of the states. The 16 states omitted in 1917 are: California, Washington, Oregon, Colorado, Nebraska, Kansas, Minnesota, Wisconsin, Michigan, Missouri, Iowa, Georgia, Texas, Alabama, Arkansas and Mississippi.

Scholars from these states will be selected in 1918 and another 16 states will be omitted.

The number of scholars in residence at Oxford in the course of the academic year 1915-16 was, Americans, 76; Colonials, 18.

Among the Oxford distinctions gained by scholars during the year (1915-16) were the following: H. L. Bruce (Texas, 1913), Beit prize; C. Eagleton (Okla., 1914), Robt. Herbert Memorial prize; B. H. Bansom (Ala., 1914), Canon Hall, Jr., Greek Testament prize.

A number of Amer. scholars were granted leave of absence for varying periods to assist in war work of Red Cross Soc. and the Y. M. C. A. Some of the Colonials who came into residence left in course of year to take up military service.

Information in regard to particulars can be secured at any college, or from F. J. Wylie, Oxford secretary to the Rhodes Trustees, Oxford, Eng., or sec. to Rhodes Trust, 17 Waterloo pl., London, S. W. The World War has considerably interfered with the normal operation of the scholarship system.

POSTAL SAVINGS BANK SYSTEM.

The Postal Savings Bank System was established in Brooklyn on Sept. 1, 1911, at the General Post Office, Washington and Johnson streets. The hours of deposit are from 9 a.m. to 5 p.m. and at General P. O. to 9 p.m. Postal savings deposits are accepted at stations and sub-urban post offices. The first postal savings bank to be opened in N. Y. City started at the General P. O., Mhntn., on Aug. 1, 1911.

Information for Depositors.

The Postal Savings System is established for the purpose of providing facilities for depositing savings at interest with the security of the U. S. Government for repayment. Accounts may be opened and deposits made by any person of ten years' of age or over in his or her own name, and by a married woman in her own name and free from any interference or control by her husband.

How to Open an Account.

To open an account a person must fill out and sign an application. Deposits will be received in the form of either Postal Savings Cards properly completed to the amount of \$1, or cash not to exceed \$1,000 for any one account. Deposits are evidenced by postal savings certificates issued in fixed denominations of \$1, \$2, \$5, \$10, \$20, \$50 and \$100, each bearing the name of the depositor, the number of his account, the date of issue, the name of the depository office and the date on which interest begins. No account may be opened for less than \$1.

Savings Cards and Stamps.

Postal Savings Cards and Postal Savings Stamps, valued at 10c. each, are sold at the retail stamp windows of the General Post Office and at all stations.

Amounts less than \$1 may be saved for deposit by the purchase of 10c. postal savings cards and 10c. postal savings stamps. Each card contains blank spaces to which savings stamps may be affixed. A postal savings card with nine 10c. savings stamps thus affixed will be accepted as a deposit of \$1. Savings cards and stamps will be redeemed without the issue of savings certificates. Deposits may be made by mail.

Two Per Cent. Interest Paid.

Interest on any deposit is payable annually at the rate of 2% per annum, computed on each savings certificate separately. No interest

will be paid on money which remains on deposit for a fraction of a year only. Deposits will bear interest from the first of the month next following that in which deposited. Interest will continue to accrue on a savings certificate as long as it remains outstanding, certificates being valid until paid, without limitation as to time. Compound interest is not allowed on an outstanding certificate, but a depositor may withdraw interest payable and include it in a new deposit, which will bear interest at the regular rate. A depositor may at any time withdraw the whole or any part of his deposits to his or her credit with interest payable, by surrendering savings certificates, properly indorsed, for the amount desired. Deposits to, or withdrawals from, an account may be made by depositor's representative upon properly filling out forms provided for that purpose, or by mail. In case of death the entire account with interest due will be paid to executor or persons entitled to receive it, upon application in proper form. A woman who opens an account and afterward marries must present her savings certificates at her office in order that the certificates may be indorsed as payable to her in her new name.

Postal-Savings Bonds.

A depositor will be permitted to exchange the whole or any part of his deposit in sums of \$20, \$100 or \$500, into U. S. registered or coupon bonds bearing interest at the rate of 2½% per annum, payable semi-annually, and redeemable at the pleasure of the U. S. after one year from date of issue, both principal and interest payable 20 years from such date in U. S. gold coin. Such exchange may be made under date of Jan. 1 and July 1 of each year, provided such bonds are then available. Application for such bonds may be made at any time. Those for issue Jan. 1 must, however, be applied for not later than 1st business day of preceding Dec., and those for issue of July 1 not later than 1st business day of preceding June.

On the application of any holder the Board of Trustees will purchase postal-savings bonds at par. Bonds sent to the board for purchase must be assigned to the "Board of Trustees, Postal Savings System."

THE NEW YORK STATE SCHOOL OF AGRICULTURE ON LONG ISLAND.

The N. Y. State School of Agriculture at Farmingdale, N. Y., which aims to make farmers out of young and old city-bred people of both sexes, has been in operation since March, 1916.

The State School has been the center of a number of war food production activities. It has co-operated with the L. I. Food Reserve Battalion in distributing to farmers 20,000 worth of seeds and about 20,000 fruit trees at prices much below current market prices. The Women's Section of the Navy League sent 80 women to the school to learn farming. A Farm Cadet Camp of city boys was established at the school. These young men endeavored to make up for the scarcity of labor on farms. Through its extension service the State School aids the farmer by personal visits, bulletins and correspondence. 25,000 people were addressed at meetings or visited in 1917. Visitors are welcome at the school at all times. Approximately 60,000 visited or saw the school in 1917. Detailed information will be sent on request to A. A. Johnson, Director, Farmingdale, L. I.

Members of the Board of Trustees are: H. D. Nessler, N. Y., Pres.; W. W. Niles, Bronx, Vice-Pres.; Wm. W. Mills, Staten Island, Sec. Wm. M. Baldwin, Garden City, Treas.; J. W. Heine-man, Hollis; L. MINERAL PRODUCTION OF NEW YORK.

The mineral production of N. Y. State, taking into account crude materials of mine and quarry rather than elaborated products, was valued in 1916 at \$45,654,770, according to statistics collected by State Geologist's Office in co-operation with U. S. Geological Survey. It was the largest output on record and represented an increase of over 25% for related industries during the year.

List lacks some of the metals and minerals conspicuous in the industries of other States—like gold, silver, copper, lead and coal—but still is fairly extensive, comprising over 30 different products. The most important of the metallic minerals is iron ore, of which a total of 1,464,917 long tons, valued at \$5,571,429, was contributed by mines in the Adirondacks, Hudson Highlands and Clinton belt of Central N. Y. This represented a substantial gain over total for 1915. Zinc ore represents latest addition to mineral products, but output from Edwards dist. of St. Lawrence Co. has attained importance. Pyrite was mined in same region.

The salt industry ranks as one of the historic mineral industries of N. Y. The reported total of 14,087,750 barrels, valued at \$3,639,798, for 1916 never has been exceeded.

Petroleum and natural gas contributed normal quotas to output, former with total of 874,087 barrels and latter with a flow of 8,594,187,000 cubic ft.

Other materials on list included apatite, cement, clay products, diatomaceous earth, emery, feldspar, garnet, graphite, gypsum, marl, mica, metallic paint, mineral waters, molding sand, various stone products and talc.

Mgr., J. P. Bird. Hdqrs., 30 Church, N. Y. "The Natl. Assn. of Mfrs. disapproves absolutely of strikes and lockouts and favors an equitable adjustment of all differences between employers and employees by any amicable method that will preserve rights of both parties. Employees have the right to contract for their services in a collective capacity, but any contract that contains a stipulation that employment should be denied to men not parties to the contract is an invasion of the constitutional rights of Amer. workman, is against public policy, and is in violation of conspiracy laws. This assn. declares its unalterable antagonism to the closed shop and insists that the doors of no industry be closed against American workmen because of their membership or non-membership in any labor organization."

NATURALIZATION AND QUALIFICATION OF VOTERS.

WHERE TO MAKE APPLICATION — Top floor Brooklyn Post Office Bldg. for residents of Brooklyn, Long Island and Staten Island.

Room 7, Hall of Records, Brooklyn, for residents of Brooklyn.

Room 701, Hall of Records, Mhnt., for residents of Mhnt.

Bronx Co. Court House, 161st and 3d av., for the Bronx.

P. O. Bldg., Mhnt., for Mhnt., Bronx, Columbia and Rockland, Putnam, Orange, Dutchess, Sullivan, Greene, Ulster and Westchester counties, or in Co. Clerk's office in the county in which applicant resides.

CITIZENSHIP—The Federal statutes declare the following persons to be citizens:

All persons born in United States and subject to the jurisdiction thereof, excluding Indians not taxed.

All persons legally naturalized.

All children born out of jurisdiction of United States, whose fathers are at time of their birth citizens thereof, but the right of citizenship shall not descend to children whose fathers have never resided in the United States.

A child born without the U. S. of alien parents shall be deemed a citizen of the U. S. by virtue of the naturalization of or resumption of Amer. citizenship by the parent, provided that such naturalization or resumption takes place during the minority of such child and that the citizenship of such minor child shall begin at the time such minor child begins to reside permanently in the U. S.

An American woman who marries a foreigner takes the nationality of her husband. At the termination of the marital relation she may resume her American citizenship, if abroad by registering as an American citizen within 1 year with a consul of the U. S., or by returning to reside in the U. S., or if residing in the U. S. by continuing to reside therein.

All persons who were citizens of Hawaii on Aug. 12, 1898, are citizens of the U. S. The inhabitants of the Philippines and Porto Rico, while entitled to protection of the United States under the Constitution, must apply for citizenship, if they wish to enjoy its privileges, in the same manner as the aliens, except that they are not required to renounce allegiance to any foreign sovereignty, although they must declare their intention to become citizens at least 2 years in advance of the application.

NATURALIZATION—The applicant for citizenship must have resided in the United States for the continued term of at least 5 years next preceding his application, and 1 year within State or Territory where the court is held that admits him. Not less than 2 nor more than 7 years before he files his petition for naturalization he must declare, on oath, before any court of record, with seal, of unlimited jurisdiction, of any State or Territory, or before a District Court of the United States, his intention to become a citizen, etc. Such declaration must be filed, however, in the district in which the alien resides. The language excludes County Courts, hitherto having jurisdiction. Any person over 18 years of age may declare intention. There is a fee of \$1 for receiving and filing declaration of intention; of \$2 for filing petition, and of \$2 for making final order and issuing citizenship certificates, if granted, the whole fee being payable when petition is filed. Blanks for statement of the facts material for first or final papers may be obtained from court clerk.

The petition must be accompanied by the affidavits of at least two witnesses who are citizens of the United States who have known

the applicant for at least five years and have known him to be a resident of the United States for five years and of the State or Territory for one year.

Children of a naturalized citizen who become residents of the United States during their minority are entitled to citizenship without being naturalized.

Aliens of the age of 21 years and upward, who have enlisted in the armies of the United States, in the regular or volunteer forces, and have been honorably discharged, are entitled to become citizens upon petition, without previous declaration of intention, and are not required to prove more than 1 year's residence in the U. S.

Seamen of foreign birth, who have declared intention to become citizens, may be naturalized after 3 years service on merchant vessels of U. S., subsequent to date of declaration.

Seamen of U. S. navy, U. S. marines, U. S. Revenue Cutter service men and U. S. naval auxiliary men, who have served 4 years and have been honorably discharged, or who have received ordinary discharge with recommendation for re-enlistment, are entitled to petition for citizenship upon presentation of discharge, without declaration of intention, and may be naturalized immediately without having name posted for 90 days.

When any naturalized citizen shall have resided 2 years in the foreign state from which he came, or for 5 years in any other foreign state it shall be presumed that he has ceased to be an American citizen and the place of his general abode shall be deemed his place of residence during said years.

NATURALIZATION FORBIDDEN—Only free white persons and persons of African birth or African descent can be naturalized. Law prohibits naturalization of any alien with whose country we are at war at time he files his application.

RESIDENCE—A residence once acquired continues to be the residence of a person until he absents himself therefrom and locates in another place with the intention of there remaining. For the purpose of voting, no person has gained or lost a residence by reason of his presence or absence while in the employ of the United States; nor while engaged in the navigation of the waters of the United States, or the high seas; nor while a student in any seminary of learning; nor while kept in an almshouse or institution wholly or partly supported at public expense or by charity, nor while confined in any public prison; but registration and voting must be done at residence.

QUALIFICATIONS OF VOTERS—Every male citizen 21 years old is entitled to vote if he shall be on or before the day of election a citizen of the United States 90 days, a resident of the State 1 year, a resident of the county 4 months, a resident of the election district 30 days. A person otherwise qualified whose birthday is on the day following election is entitled to vote. INHERITANCE OR TRANSFER TAX RECEIPTS.

The net amount received for inheritance or transfer taxes for fiscal year ending June 30, 1917, was largest ever received, amounting to \$13,791,969.65.

The exemptions and rates of tax under Sec. 221 and 221a, respectively, remain the same as 1917, with exception that the court has held that the \$500 limitation mentioned below is an exemption to that amount if the individual transfer exceeds the value of \$500 and the excess only is taxable as follows:

Class A. \$5,000 exemption—All transfers to a father, mother, husband, wife, widow or child, excess only taxable. A like exemption is allowed an adopted child.

\$500 limitation—All transfers to lineal descendants of less than \$500 to each are not taxable; if over \$500, the excess amt. is taxable.

Rates of tax—1% on any amt. subject to tax, up to \$25,000; 2% on next \$75,000, or any part thereof; 3% on next \$100,000, or any part thereof; 4% on balance of each transfer.

Class B. \$500 limitation—All transfers to a brother, sister, wife or widow of a son, or the husband of a daughter, or to a child to whom the decedent, etc., stood in the mutually acknowl-

edged relation of parent, if less than \$500 to each person, are not taxable. If over \$500, the excess amt. is taxable.

Rates of tax—2% on any amt. subject to tax, up to \$25,000; 3% on next \$75,000, or any part thereof; 4% on next \$100,000, or any part thereof; 5% on balance of each transfer.

Class C—All transfers to any other person or corp. liable to tax, if less than \$500 to each, not taxable; if over \$500, the excess amt. is taxable.

Rates of tax—5% on any amt. subject to tax, up to \$25,000; 6% on next \$75,000, or any part thereof; 7% on next \$100,000, or any part thereof; 8% on balance of each transfer.

A new section, 221b, was added to article 10 of tax law and in force July 1, 1917, which imposes an additional tax of 5% upon the transfer of all investments as defined by the Investment Tax Law (article 15 of the Tax Law) unless the tax on such investments shall have been paid and stamps affixed for a period including the date of the decedent's death, or unless the personal representatives of the decedent can prove that a personal property tax was assessed and paid on such investment or secured debt during the period it was held by the decedent.

REV. DR. ALMON GUNNISON.

The Rev. Dr. Almon Gunnison, president emeritus of St. Lawrence University, died at his home, 50 Rugby road, Bkln., June 30, 1917, in the 74th year of his age. Dr. Gunnison was born in Hallowell, Me., March 2, 1844. He was educated at Dalhousie College, Halifax, N. S.; the Green Mountain Institute, Woodstock, Vt., and was graduated from Tufts College in 1864, and in the theological course at St. Lawrence Univ. in 1868, being ordained as a Universalist minister in the same year. For 3 years thereafter he was minister of the church in Bath,

Me., and in 1871 went to All Souls' Church, Bkln., where he was pastor for 19 years, and then became pastor of the First Universalist Church in Worcester, Mass., where he remained until 1898, when he was elected president of St. Lawrence Univ., which includes the Brooklyn Law School, retiring as emeritus president Nov. 1, 1914.

Dr. Gunnison was the author of several books of essays and travels. He was an ardent advocate of free colleges as well as free schools. He was given the degree of LL.D. by Union College in 1902 and by Tufts in 1905.

THE HALL OF FAME.

In March, 1900, Chancellor MacCracken of New York University, announced that \$250,000 had been given that institution for a Hall of Fame of great Americans. The conditions were that 50 names might be chosen in 1900 and 5 more each succeeding 5 years through the 20th century. 100 electors from all of the 45 States were asked to make nominations and to indicate each one his choice of 50 names. Upon Oct. 1, 1900, it appeared that 97 electors had voted and that 29 names had received a majority of 51 votes. The number of votes for each was as follows: George Washington, 97; Abraham Lincoln, 96; Daniel Webster, 96; Benjamin Franklin, 94; Ulysses S. Grant, 93; John Marshall, 91; Thomas Jefferson, 91; Ralph Waldo Emerson, 87; Robert Fulton, 86; Henry W. Longfellow, 85; Washington Irving, 83; Jonathan Edwards, 82; Samuel F. B. Morse, 82; David G. Farragut, 79; Henry Clay, 74; Nathaniel Hawthorne, 73; George Peabody, 74; Peter Cooper, 69; Robert E. Lee, 68; Eli Whitney, 69; John J. Audubon, 67; Horace Mann, 67; Henry Ward Beecher, 64; James Kent, 65; Joseph Story, 64; John Adams, 62; Wm. E. Channing, 58; Gilbert Stuart, 62; Asa Gray, 51.

In 1904 the constitution of the Hall was amended to provide for choosing separately 10 names of famous American women in 1905, and 2 in each succeeding quinquennium.

In Oct., 1905, the Senate received the ballots of 95 electors, of whom only 85 undertook to consider the names of women. A majority of 51 was demanded, but in the case of the names of women a majority of only 47. The following 8 persons were found to be duly chosen: John Quincy Adams, 60; James Russell Lowell, 59; William T. Sherman, 58; James Madison, 56; John G. Whittier, 53; Mary Lyon, 53; Emma Willard, 50; Maria Mitchell, 48.

In Oct., 1910, the Senate received the votes of 97 electors; 51 votes were required for choice; 10 names were added, as follows: Harriet Beecher Stowe, 74; Oliver Wendell Holmes, 69; Edgar Allan Poe, 69; James Fenimore Cooper,

62; Phillips Brooks, 60; William Cullen Bryant, 59; Frances E. Willard, 56; Andrew Jackson, 53; George Bancroft, 53, and John Lothrop Motley, 51.

Hereafter instead of one elector for each state, the rule requires one for each state, or each group of states, having 1,000,000 inhabitants. A new rule requires two-thirds of the electors in order to choose any name that is not indorsed by that group (among the 7 groups of electors), to whom it is sent in May of the year of election for special consideration and report. Any name in the final list of nominations made up June 30 so indorsed, may be chosen by a mere majority of the 100 electors. The electors will have the entire summer to weigh the merits of the candidates, but must return their final ballots by Oct. 1.

For the election, in 1915, the 100 electors were called to choose not more than 23 American men and not more than 11 famous American women. 97 electors sent ballots, 3 having died during year; 9 names were chosen by a majority of 49 or more electors, as follows: Alexander Hamilton, 70; Mark Hopkins, 69; Francis Parkman, 68; Louis Agassiz, 64; Elias Howe, 61; Joseph Henry, 56; Rufus Choate, 52; Daniel Boone, 52; with one woman, Charlotte Cushman, 53.

The Constitution was amended in 1914, by striking out the separable election of foreign-born Americans, so that the 4 foreign names which had been chosen in 1905 and 1910 were resubmitted in 1915 for election in competition with native-born Americans. Two names, Alexander Hamilton and Louis Agassiz, were approved. The others, John Paul Jones and Roger Williams, lacked a majority, but remain in nomination for 1920. Thus 50 famous men in all have been admitted, and 6 famous women. Total, 56.

Nominations for 1920 should be addressed to Chancellor Emeritus MacCracken, University Heights, New York City.

WORK-STUDY-PLAY ("GARY") PLAN.

The experiment with the "Gary" system of instruction, i.e., the double use of 1 school bldg. by 2 different groups, utilizing playgrounds, assembly rooms, outside libraries, etc., together with shops for prevocational training, was continued and extended in 1917.

Up to Nov. 1, 1917, the plan had been inaugurated in 33 schools in the Bronx, B'k'n. and Mh'tn. The "Gary" plan was advocated as a means of solving the part-time problem without the erection of new school bldgs.

The "Gary" plan was first introduced in N. Y. C. in 1915. after a visit to Gary, Ind., by Mayor Mitchell, Thomas W. Churchill, then pres. of the Board of Education, W. G. Wilcox and others. Mr. Churchill differed with the Mayor on the extension of the plan. In 1916 Mr. Wilcox was elected president. The majority of the Board was in accord with the views of the Mayor, and it was determined to extend the system. \$6,000,000 was appropriated for the purpose of making alterations and additions to schools. No. 89, Flatbush, and No. 45 the Bronx, were selected as the first schools. Mr. Wirt, Supt. of Gary Schools, was brought to N. Y. C. at a stipend of \$10,000 a year,

for which he was to give advice for 10 weeks each year. The extension of the Gary plan brought great opposition from parents, and it was made an issue in the 1917 Mayorality campaign, Judge Hyland, Mayor-elect, opposing its extension until it had been found suitable to the needs of the city.

SCHOOL TEACHERS' RETIREMENT FUND.

N. Y. City and the school teachers share in equal amount the cost of pension benefits to be provided (law enacted 1917). The cost will represent for future entrants into the teaching force approximately 10% of their average salaries. One-half of this, or 5%, will be contributed by the teachers and the other half, or 5%, by the city. These contributions will develop a fund, out of which the pensions can be paid on the expiration of the required period of service. For present employees the city will not only provide ½ of their ultimate retirement allowance, but will in addition make up the arrearages due to accrued liability. This will be done for each teacher in proportion to the length of his service.

The new retirement plan involves two factors: (1) An annuity of 25% of the final salary, paid out of the contributions of the teacher, and (2) a service pension of 25% of the average final salary, paid for out of the contributions of the city. In addition to this benefit, each teacher is insured against disability occurring at any time after 10 years of service to an amount of 20% of the final salary, which is provided by the contributions of the city with such additional sum as may be purchased in the form of an annuity out of the teachers' contributions made up to the time of his retirement on disability.

The Dept. of Insurance is to have supervision over the conduct of the business of the fund.

The Retirement Board consists of the Pres. of the Board of Education, the Comptroller of N. Y. C., 2 members appointed by the Mayor, one of whom shall be a member of the Board of Education, and 3 members elected by representatives of the supervising and teaching force. The 3 latter are: Clara C. Calkins, P. S. 6, B'k'n. (for 1 yr.); Fred'k Z. Lewis, Boys' H. S., B'k'n. (for 2 yrs.); Harriet M. Porritt, P. S. 43, Mh'tn. (for 3 yrs.).

NEW YORK CITY TRANSIT DEVELOPMENT.

At the beginning of 1918 there were in operation more than 150 miles of 315 addl. track miles of new rapid transit lines provided for under the Dual System Contracts, signed in 1913. It is estimated that fully 70 more track miles will be in operation in March, 1918. By the end of the year it is estimated that fully ¾ of all dual system mileage will be in service.

Contracts for construction work already awarded involve an outlay of more than \$202,000,000. General construction contracts that had not been awarded up to Jan. 1, 1918, include Sec. No. 3 of the Culver Line in B'k'n.; the elevated portion of the 14th St. Eastern Line in Williamsburg and Ridgewood; the Queensboro subway extension west to Times Sq., Mh'tn.; the Nassau St. subway and several contracts for station finish and track installation. It is expected that practically all of the work will be completed in 1919.

New rapid transit lines opened during the year 1917 include the Astoria and Corona Avenue branches, Queens; the Jerome Av. branch, the Bronx; White Plains Road extension, the Bronx; Bergen Av. connection, the Bronx; B'way Subway,

Mh'tn., from Union Sq. to Coney Island via Sea Beach Line; West End Line, B'k'n., from 25th av. to Coney Island; Jamaica Av. Line, from Cypress Hills to Greenwood av., Queens; Second Av. elevated, Mh'tn., connection to Queens lines via Queensboro Bridge.

The Lexington Av. and Seventh Av. subways, Mh'tn., will be placed in operation, with additional portions of the Bronx branches of the Lexington Av. Line not yet in service, and service in the B'way subway, Mh'tn., will be extended north to Times Sq. early in 1918. Later in 1918 a portion of the Culver Line, the Nostrand Av. Line, the Eastern Parkway Line, the Brighton Beach reconstruction, B'k'n.; the 162d St. connection, the Webster Av. extension, a portion of the Pelham Bay Park branch of the Lexington Av. subway, the Bronx, and the Whitehall St. and Old Slip-Clark St. Tunnel lines from Mh'tn. to B'k'n. will be placed in operation.

(Sheets showing progress on the Dual System contracts are issued monthly by the Public Service Commission, 1st Dist., 120 B'way, N. Y. C., J. B. Walker, Sec.)
